

## Welcome NCR eCommerce User Group Members

In an effort to launch development for a number of new and exciting eCommerce Internet Banking enhancements, we are asking all institutions to cast their initial votes to prioritize what features/functions they would like NCR eCommerce to develop in 2008. With this announcement, we are including a series of surveys which you must complete to specify the items your institution desires the most at this time. The surveys are very brief and include only a few questions each.

By now, all of you should have received the most current **NCR eCommerce User Group RFC Tracking** spreadsheet dated **February 22, 2008**, which includes detailed descriptions for all the enhancements on which you will be voting. If you need to download the spreadsheet, [click here](#). If you have already received it but have not yet had an opportunity to review the features, please do so as soon as possible before launching the surveys from the links below.

To ensure your participation, please complete the surveys no later than **March 7, 2008**. Please submit only one collaborative survey for each application (Business and Consumer) for your institution. After all surveys are closed, we will gather the results and communicate them to you in a follow-up announcement. Then, provided NCR receives votes from at least five Retail banking clients (for Retail-specific RFCs) and three Business-Banking clients (for small business-specific RFCs), NCR's development group will determine a schedule for development and implementation and communicate those plans to you.

As always, thank you for your ongoing participation!

**Kathy Litchman**

Chairperson, NCR eCommerce Solutions User Group
